SMALL BUSINESS

SIN 711-99: INTRODUCTION OF NEW OFFICE FURNITURE SERVICES/PRODUCTS

A new or improved product not currently available under any GSA contract that has the potential to provide more economical or efficient means for Federal Agencies. It may be a product existing in the commercial market not yet introduced to the Federal Government or a product that has been improved. As determined by the Government, there are no similar items available under an existing SIN.

FSC/PSC CODE: 7110

NAICS CODE: 337214 OFFICE FURNITURE (EXCEPT WOOD) MANUFACTURING

Contract Number: **GS-28F-0016V**

Period Covered by Contract: **11 February 2009** thru **10 February 2019**

Pricelist Current through Modification: **PA-0028** dated **October 28, 2016**

Contact for Contract Administration

Primary: Patrick Rogers, Business Manager, patrickr@connectrac.com

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage! ®, a menu-driven database system. The INTERNET address GSA Advantage! ® is: GSAAvantage.gov.

For more information on ordering from Federal Supply Schedules click on the FSS Schedules button at fss.gsa.gov.

Company Overview

Connectrac® is the modular, floor based wireway alternative to expensive core drilling bringing power and communications from the wall to the user in all interior applications. This patented wireway solution allows interior designers, architects, facility managers, electrical engineers and others involved in renovation or new construction the ability to maintain their focus on aesthetics while still meeting the demands of power, IT and communications wires and cabling.

Dallas, Texas-based Connectrac, founded in 2005, is a privately owned company with representatives throughout the US, Canada and increasingly throughout the world. It sells its products through electrical distributors, contract furniture dealers and others, and offers an in-house team of design/technical professionals. Connectrac is rapidly emerging as the new industry standard replacing core drilling, trenching or using unsightly power poles for almost every type of facility – corporate, government, education, airport, retail hospitality, casino and others needing power and telecommunications access.

Clint Strong, the company's founder and a licensed architect, launched Connectrac when he was inspired to solve problems he regularly encountered while working as an architect on corporate interiors projects. He is now supported by a world-class team of product designers, corporate staff, manufacturers and representatives.

The entire system is a mere .75" high in profile which blends into the flooring.

Alliances and Partners

In today's rapidly evolving technological and networked world, alliances and friendships forged out of a common bond and vision for the future is critical. Connectrac is committed to unleashing the creativity, design and practicality of bringing power and communications to interior applications from the wall and avoiding expensive and disruptive core drilling and trenching, unsightly power poles and inferior floor work-arounds. We have purposely designed our products and solutions to be open source and flexible to accommodate virtually all cables, connectors and wires.

If you would like to team up with Connectrac to say goodbye to core drilling or clunky raceways, we'd love to hear from you. Please send us feedback and the appropriate Connectrac representative will quickly respond to your inquiry. We look forward to working with you in the future!

Contact Contractor
- 24a. Special Attributes such as environmental attributes:
A variety of products and offerings containing high post-industrial recycled content. RoHS compliant. Highly Recyclable. All Connectrac Systems are reusable, relocatable
- 24b. Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services:
Information can be found at:
www.connectrac.com
The EIT Standards can be found at:
www.section508.gov/
25. Data Universal Number System (DUNS):
176888746

Customer Information

26. Notification Regarding registration in System for Award Management (SAM) formally Central Contractor Registration (CCR):

Connectrac is registered in the SAM Database.

27. Inspection / Acceptance:

The Government or its designate shall inspect products for visible or concealed damage upon receipt. Visible damage shall be annotated upon the shipping documents, and the carrier notified for inspection. Items shall be inspected for concealed damage within 15 days in accordance with NMF transportation tariff

28. Cancellation:

Cancellation shall be at No Charge prior to production. Once in production, the contractor shall be entitled to collect costs incurred if products are not sold within 120 days. Upon shipment, refer to no. 29, "Restocking" policy.

29. Restocking:

Restocking shall be authorized in writing prior to return of items. Restocking charges of 25% shall apply. The Government shall pay and bear responsibility for return transportation. Return credit is subject to inspection and product being returned in salable condition

30. Freight Damage:

Visible damage must be annotated on Bill of Lading at time of receipt. Concealed damage must be reported to freight carrier within 15 days and a request for inspection made. Prior to inspection, do not remove, relocate or dispose of packaging.
